

Minnesota Energy Careers Website

www.MnEnergyCareers.org

The Minnesota Energy Careers website (www.MnEnergyCareers.org) serves Minnesotans interested in energy careers. If you are a student, job seeker, or career changer, the website can help you research energy careers, learn about energy education options, and find Minnesota energy employers.

Visit the Minnesota Energy Careers website at www.MnEnergyCareers.org

The Minnesota Energy Careers website is a part of ISEEK (www.iseek.org). This means the website focuses on ISEEK's energy-related occupations, fields of study, programs, salaries, and other related data. You'll also find energy-specific features, like green energy careers, energy worker interviews, student testimonials, and energy videos, polls, and quizzes.

The Minnesota Energy Careers website offers career descriptions in four main energy industries: traditional electric utilities, renewable energy generation, electric and gas distribution, and energy efficiency building operations.

You'll find out if your interests match energy careers, and take quizzes to test your energy knowledge. You'll also find:

- Green energy careers
- Day in the life interviews
- Licensed energy careers
- Energy industry profiles
- Energy certifications

The Minnesota Energy Careers website gives you access to a wealth of data to achieve your education goals, including:

- 40 energy majors
- 250 energy programs
- Links to ISEEK for Minnesota schools and the courses available in your region

You'll get help preparing for an energy career by looking into classes to take in high school, and reading student testimonials from energy program graduates. You'll learn about the different ways to prepare for energy careers, including pathways developed around specific energy specialties, like ethanol. If you're ready to get started or transition into the energy field, you'll find information about training opportunities, including energy majors, programs, certifications, and apprenticeship programs.

10 Fun Things To Do On The Website

- See if your **interests** match energy careers
- Watch **videos** on energy career options
- Learn about **green energy careers** and how your job can make a difference

- Read **'day in the life' interviews** with real energy workers
- **Share** online what you find with friends and family
- Contact an **energy employer**
- Read **student testimonials** about Minnesota energy programs
- Voice your opinion with **polls** and **blogs**

energy jobs

Current job openings are accessible on the Minnesota Energy Careers website thanks to a partnership with MinnesotaWorks, the state job bank. You'll also find up-to-date salary data and energy careers in demand in your region.

The website has information about how employers hire, with tips on planning a successful job search. You'll also find contact information for energy employers in electric and natural gas utilities, biodiesel plants, and ethanol plants.

If you are a **parent** or **guardian** of a teen interested in energy, check out the "Links" section of the website. You'll find answers to common questions like "Is energy a good industry for my teen's career?" and "Does my teen need a college degree?" You'll also find links to more career and educational resources for families.

Educators, if you are teaching high school students interested in energy, the website includes information about the basic skills needed, as well as the specialized skills for the industry. You'll also find helpful links to high school lesson plans and activities for your energy curriculum. This can all be found in "Teach Energy" within the Education section.

Funding

The Minnesota Energy Careers website was funded in part by a High Growth Job Training Initiative grant to Minnesota State Colleges and Universities from the U. S. Department of Labor's Employment and Training Administration.

The website was also part of a workforce solution, funded by a grant awarded to the Southwest Minnesota FIRST Collaborative under Workforce Innovation in Regional Economic Development (WIRED), as implemented by the U.S. Department of Labor's Employment and Training Administration.
